Summary

Backend Software Engineer with experience building **distributed, cloud-native systems** in **Java, Spring Boot, and Node.js**, and shipping **LLM/RAG-powered AI services** on **GCP**. Delivered **20+ production REST APIs**, cut deployment time **30%** via CI/CD automation, and reduced manual process effort **40%** through agentic AI pipelines. Strong foundation in **Data Structures, Algorithms, and System Design** (LeetCode Knight, Codeforces Specialist).

Experience

Google

March 2026 – Present

Software Application Development Apprentice | Gurgaon, India

- Architected **AI-powered backend services** on **Google Cloud Platform (GCP)** using Cloud Run, Pub/Sub, and Vertex AI, enabling scalable, cloud-native production workflows.
- Engineered end-to-end **Retrieval-Augmented Generation (RAG)** pipelines and **agentic AI workflows** with LLMs and vector databases, cutting manual process effort by **40%**.
- Strengthened system reliability and code quality by driving code reviews and system design discussions, applying **Google engineering best practices** across test coverage and architecture.

Synoptek

Jan 2025 – Mar 2026

Software Developer Intern (Promoted to Associate Software Engineer) | Ahmedabad, Gujarat, India

- Engineered **20+ REST APIs** in **Java, Spring Boot, Node.js, and Express.js** using **microservices** and Clean Architecture, reducing API response time by **20%**.
- Built scalable backend services integrated with **SQL Server** and **Google BigQuery**, processing and managing datasets of **100k+ records** with high data integrity.
- Containerized and deployed backend applications on **GCP** with **Docker**; automated **CI/CD** pipelines via **GitHub Actions**, reducing deployment time by **30%**.

Technical Skills

- Backend & System Design:** Java, Spring Boot, Spring Data JPA, REST APIs, Microservices, Distributed Systems, System Design, Apache Kafka, Hibernate, Node.js, Express.js
- Cloud & DevOps:** Google Cloud Platform (GCP), AWS, Docker, Kubernetes (basics), CI/CD, GitHub Actions
- AI / GenAI:** LLMs, Retrieval-Augmented Generation (RAG), Agentic AI Workflows, Vector Databases, Embeddings
- Databases & Caching:** PostgreSQL, MongoDB, SQL Server, Google BigQuery, Redis
- Languages:** Java, C++, Python, JavaScript, SQL, C#
- Core CS:** Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Computer Networks

Projects

Bitezy | [Live](#) | [Restaurant Portal](#) | [Delivery Portal](#)

- Architected and shipped a **production-deployed, multi-tenant** food delivery platform serving customers, restaurant owners, and delivery agents, with real-time order tracking via **WebSockets** and role-based analytics dashboards.
- Built with **React.js, Node.js, Express.js, MongoDB, AWS, Cloudinary**; implemented **JWT-based authentication**, Google Maps geolocation, and Fast2SMS transactional notifications.

Achievements

- LeetCode Knight** — Achieved **Knight** rating (top 5% globally) with 500+ problems solved across DSA topics.
- Codeforces Specialist** — Attained **Specialist** rating through contests with 1000+ problems solved.
- TCS CodeVita** — Ranked **894 globally** out of 100,000+ participants. [Certificate](#)
- SSIP Hackathon 2023** — Secured **Runner-Up** among 100+ teams; built a working prototype in 24 hours.

Education

LDRP Institute of Technology and Research

B.E. in Computer Engineering | CGPA: 8.11/10

Aug 2021 – Apr 2025

Gandhinagar, Gujarat, India
