## Experience

---

### Google

March 2026 – Present

*Software Application Development Apprentice | Gurgaon, India*

- Learning and working with **Google Cloud Platform (GCP)** services, gaining hands-on experience in cloud-native application development and deployment.
- Exploring **LLMs, Retrieval-Augmented Generation (RAG)**, vector databases, and agent-based workflows through internal projects and technical learning initiatives.
- Collaborating with engineers and mentors to understand software development best practices, system design fundamentals, code reviews, and production-scale engineering workflows.

### Synoptek

Oct 2025 – Mar 2026

*Associate Software Engineer | Ahmedabad, Gujarat, India*

- Designed and developed **20+ REST APIs** in **.NET Core** following Clean Architecture principles, reducing average API response time by **20%** and improving overall system scalability.
- Built efficient **Node.js** data services over **SQL Server** and **Google BigQuery**, processing and managing **100k+ records** with optimized query performance.
- Deployed and operated cloud services on **AWS** and **GCP**; set up **CI/CD pipelines** using Docker and GitHub Actions, reducing deployment time and improving release reliability.

### Synoptek

Jan 2025 – Sept 2025

*Software Developer Intern | Ahmedabad, Gujarat, India*

- Built and optimized **REST APIs** using **Node.js/Express** and **.NET**, applying Clean Architecture and modular design patterns to improve response time by **15–20%**.
- Deployed serverless and containerized services on **AWS** (Lambda, API Gateway, S3, RDS) using **Docker**, contributing to production-grade scalable infrastructure.
- Contributed to full-stack development using **React (MERN stack)**, delivering responsive front-end features integrated with backend APIs.

## Technical Skills

---

**Languages:** C++, Python, Java, JavaScript, C#, SQL

**Backend:** .NET Core, Node.js, Express.js, REST APIs, Microservices, Clean Architecture

**AI & GenAI:** LLMs, Retrieval-Augmented Generation (RAG), Agentic AI Workflows, Vector Databases, Embeddings, AI Automation

**Cloud & DevOps:** Google Cloud Platform (GCP), AWS (Lambda, S3, RDS, API Gateway), Docker, CI/CD, GitHub Actions, Distributed Systems

**Databases:** MongoDB, MySQL, SQL Server, Google BigQuery

**Frontend:** React.js, Angular, HTML, CSS, JavaScript

## Projects

---

**Bitezy** | [Live](#) | [Restaurant Portal](#) | [Delivery Portal](#)

- **Full-Stack Food Delivery Platform:** Engineered a production-deployed, multi-service food delivery system with dedicated portals for customers, restaurants, and delivery agents — featuring menu management, real-time order tracking, and analytics dashboards.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, AWS, Cloudinary; integrated WebSockets for real-time updates, JWT for auth, Google Maps for location services, and Fast2SMS for SMS notifications.

## Education

---

**LDRP Institute of Technology and Research**

Aug 2021 – Apr 2025

*Bachelor of Engineering in Computer Engineering | CGPA: 8.11/10*

*Gandhinagar, Gujarat, India*

## Achievements

---

- **LeetCode Knight** — Top competitive programming rating; consistently solved 1800+ rated problems.
- **Codeforces Specialist** — Solved **2000+ problems**; rated among top competitive programmers globally.
- **TCS CodeVita Season 11** — Achieved **Global Rank 894** out of 100,000+ participants worldwide. [Certificate](#)
- **SSIP Hackathon 2023** — Runners-up among 100+ competing teams.
